Re-emergence of Serological Assays as Important Tools in the Diagnosis and Monitoring of Viral Hepatitis

Tuesday, July 30, 2013
5:00 PM - 6:15 PM (Europe) Prague

Speaker:

Hans L. Tillmann, MD.
Associate Professor
Duke Clinical Research Institute and
Duke University Medical Center
GIHepatology
Duke University
Durham, NC USA

Learning Objectives:

After participating in this workshop, participants will be able to:

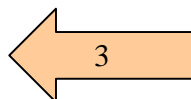

1. Describe hepatitis B and hepatitis C modes of infection, clinical presentation, and the progression of acute to chronic infection, and its differentiation
2. Describe how quantitative HBsAg is a marker for HBV activity in certain populations and can be used for HBV treatment monitoring as its clinical utility
3. Understand why HCV antigen is a marker of active infection and the clinical implications of early detection of HCV infection
4. Recognize the potential applications of an HCV antigen assay

All fields below in bold * are required.

First Name *

Last Name *

Business Email Address *

- Po vyplnění všech povinných polí označených hvězdičkou klikněte na “Register”:

How many people from the facility will be attending? *

Are you an Abbott customer? *

Do you have ARCHITECT Systems in your laboratory? *

Do you run ARCHITECT HBsAg Qualitative or Qualitative II assay? *

Do you run ARCHITECT HBsAg quantitative assay? *

Do you have experience with ARCHITECT HCV Ag? *

Do you run other ARCHITECT Hepatitis assays? *

If yes, could you list which specifically do you use?

Register
